

## Plumbing Tool Program

Students in the Plumbing programs are required to have a tool set for lab activities. Instructors provide students with a list of the minimum requirements. Please note that this is a minimum list and you may have more tools than that. We recommend that you bring the most professional set of tools you can afford. If you currently own some tools of professional quality, you can purchase what you need to fill out your set. We can provide information for vendors who want to work with students to build their professional tool sets by selling complete sets, partial sets, and offer discounts to students.

- Sets must consist of professional grade tools and match the required list.
- Tool kits will be kept in the program area and must not be removed until the student has completed the program. Program staff and the student will inspect their box and contents when the student leaves the program.
- Most residential insurance companies can provide a rider to the policy at a minimal cost to cover personal tools and toolboxes.

The cost of the preferred tools is estimated to be @\$155. If you have financial aid and expect a refund this semester, you may be able to apply the refund toward the purchase of your tools. Contact the vendor to see about those arrangements. To see if you have a refund coming to you, contact our financial aid office. See your instructor for further details and student packets from the vendors.

Several tool vendors offer substantial discounts to current students of the Plumbing training programs. You have several options to purchase your tools.

25' Tape Measure

Super wide Adjustable Wrench

Plier
