

## Welding Supplies Program

Students in the Welding programs are required to have the following supplies for lab activities. Instructors provide students with a list of the minimum requirements. Please note that this is a minimum list, and you may have more supplies than that. We recommend that you bring the most professional set of supplies you can afford. If you currently own some supplies of professional quality, you can purchase what you need to fill out your set. We can provide information for vendors who want to work with students to build their professional supplies by selling complete sets, partial sets, and offer discounts to students.

- Supplies must consist of professional grade tools and match the required list.
- Supplies will be kept in the program area and must not be removed until the student has completed the program. Program staff and the student will inspect their supplies when the student leaves the program.

The cost of the preferred supplies is estimated to be @\$125. If you have financial aid and expect a refund this semester, you may be able to apply the refund toward the purchase of your tools. Contact the vendor to see about those arrangements. To see if you have a refund coming to you, contact our financial aid office. See your instructor for further details and student packets from the vendors.

Several vendors offer substantial discounts to current students of the Welding training programs. You have several options to purchase your supplies.

Welding Jacket

Welding Gloves

Welding Helmet
